

HY-LUBE ISO 46, 68, 100 HT (High Temperature)

APPLICATION: Very high quality, multigrade, low-zinc anitwear hydraulic fluids designed for the demanding performance requirements of Hagglands-Denison, Vickers and Cincennati Milacron. HY-LUBED HT oils offer enhanced filterability and hydrolytic stability compatible with all relevant metals. HY-LUBE HT is recommended for use in all types of hydraulic applications where high temperature must be considered

PEFFORMANCE:

HY-LUBE HT hydraulic fluids meet the performance requirements of :

- Hagglands-Denison HF-O (mono and multigrade);
- Vickers M-2950-S (mono and multigrade);
- Cincinnati Milacron P-68, P-69 and P-70;
- Hagglands-Denison HF-2

TYPICAL CHARACTERISTICS:

	H46	H68	H100
Viscosity cST @ 100°C	8.4	11.2	14.5
Viscosity cST @ 40°C	46	68	100
Viscosity Index	159	155	158
Pour Point °C	-24.0	-21.0	-21.0
Flash Point °C	230	222	230
Density @ 15°C	0.885	0.880	0.885
